Archived:Adding 3rd party MTM to the Options-New Message Menu on Eseries devices

Archived: This article is archived because it is not considered relevant for third-party developers creating commercial solutions today. If you think this article is still relevant, let us know by adding the template {{ReviewForRemovalFromArchive|user=~~~~|*write your reason here*}}.

Description

In Eseries devices an e-mail MTM appears in the **Options > New Message > E-mail** menu of the messaging application, whereas in other devices, such as Nseries devices and the Nokia 3250, it appears in **Options > New Message**.

This issue can be avoided by giving an arbitrary UID in the "technology_type_uid" in the RESOURCE MTM_INFO_FILE structure in the MTM's RSS file. See the following code snippet:

```
RESOURCE MTM_INFO_FILE
  {
  mtm_type_uid = 0x10005247;
  // Technology type
  technology_type_uid =0xA00001F0;
  //(0xA00001F0 is an arbitrary UID)
  ...
  ...
  }
```
